British Columbia

British Columbia (BC) is Canada's westernmost province, bordered by the Alaska Panhandle and the Yukon and Northwest Territories to the north, and by Washington, Idaho, and Montana to the south. Alberta lies to the east, and the Pacific Ocean to the west.

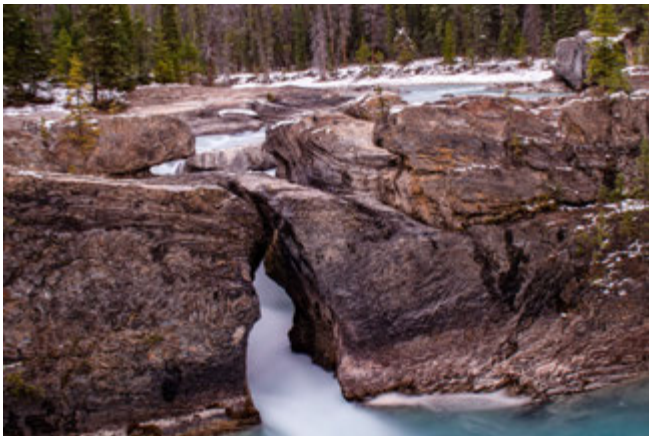

Ten mountain ranges push west from the Canadian Rockies, and ancient temperate rainforests hug the coast. In between are rolling grasslands, lush valleys, tens of thousands of lakes, glacier-fed rivers, and even semi-arid desert.

National and provincial parks protect a wide wilderness which represents the best natural features and diverse environments of the province. Approximately 14% of BC's land base is protected, and all of this wild nature supports wildlife in abundance, on land and in the sea.

British Columbia (BC) is one of the most multicultural regions in the world. The diverse nationalities contribute to BC's culture through distinct types of foods, architecture and arts.
